

## Housekeeping: How to Clean Hard Floors

---

### Routine maintenance

- Place warning signs that floor is wet/ being cleaned.
- Sweep up and remove all loose rubbish and soil.
- Wet mop floor (ToyGuard recommend microfibre flat mopping systems) with a hot solution of approved floor cleaner, pay particular attention to skirting boards and around the base of equipment and legs of tables.
- Scrub any stubborn stains or deposits with a stiff brush.
- Use a dry flat microfibre mop head to remove any remaining water and leave surface dry.

### Helpful tips

- Use colour coordinated mops for separate areas i.e. toilets, kitchens and play areas to minimise risk of cross contamination.
- Use microfibre flat mops – they can be washed up to 1000 times in the washing machine at high temperature and are up to 5 times faster than conventional mopping systems.
