

Paddling Pools – HOME USE ONLY

Hygiene

- When you have finished using the pool always dispose of the water sensibly.
TIP: fill a water butt so the water can be used in the garden later.
- Before deflating wipe the sides and base clean of any residues and then spray with ToyGuard® Surface Sanitiser. Leave for 10 minutes to dry, then deflate and pack away.

Safety

- Never leave a child unattended whilst playing in a paddling pool.
- Surfaces can be made very slippy by suncream or bubble solutions.
- Remove any insects that get caught in the water (they can bite and/or sting sometimes).
